James Oneyibo

Software Developer & Automation Engineer

Technology Entrepreneur | Full-Stack Developer | AI & Automation Solutions Builder

Valkeakoski, Finland · esirioneyibo@gmail.com · +358 45 672 6453 · GitHub

Profile

I am a multidisciplinary software developer and Automation Engineering graduate with a passion for technology, entrepreneurship and practical problem-solving.

After graduating in Electrical and Automation Engineering in 2013, I began learning software development independently. My journey started with HTML, CSS and web design and expanded into Python, Ruby on Rails, Flutter, React Native, Next.js, database systems and cloud deployment.

I have worked on logistics platforms, business applications, algorithmic trading systems, mobile applications, productivity software and automation tools. I founded Nadaruns to connect available transport capacity with businesses requiring delivery services.

My broader background includes industrial work, healthcare-related studies and experience, youth services and early childhood education. These experiences influence how I design technology around real human and business needs. My goal is to continue developing useful, reliable and accessible technology products.

Technical skills

Frontend & Web

HTML5 CSS3 JavaScript TypeScript React Next.js WordPress Ruby on Rails web development Responsive UI development Admin dashboards and business interfaces

Backend & APIs

Python FastAPI Ruby on Rails Node.js application environments REST API development Authentication and authorization Asynchronous architecture Background processing Business logic and API integrations

Mobile

Flutter Dart React Native Expo Android application development Mobile API integration Google Play deployment Mobile application troubleshooting

Databases

PostgreSQL MongoDB Redis SQLAlchemy Alembic

Data modeling, indexing, persistence and migrations

AI & Automation

AI-assisted software development LLM API integration Algorithmic trading systems
Automated decision logic Market-data processing Workflow automation Rule-based risk management
Speech recognition and translation exploration

DevOps & Tools

Git GitHub Linux VPS management Nginx PM2 systemd Hostinger CloudPanel HTTPS/SSL and DNS
Python Poetry Pytest Production deployment and debugging

Design & Content

Adobe Photoshop WordPress content management Technical documentation Content writing
Mobile and web UI/UX Promotional materials English/Finnish product localization

Additional Technical Experience

Java fundamentals Tauri desktop application exploration Windows desktop utilities
Electrical and Automation Engineering principles

Industrial Automation & CAD

PLC and HMI programming Siemens Step7 Allen-Bradley Omron CX-One Beckhoff PLCs LabVIEW
MATLAB CAD Planner AutoCAD Electrical SolidWorks SketchUp ABB and KUKA industrial robots
Automated controls, instrumentation, panel layout and machine design

Projects

LAUNCHED

Nadaruns

Founder & Product Developer

A logistics technology platform connecting shippers with independent drivers and available transport capacity.

Next.js React Native Expo FastAPI PostgreSQL Linux VPS Nginx

Website ↗ Android on Google Play ↗

DEVELOPMENT / TESTING

AegisTrade AI

Developer

A Python-based algorithmic cryptocurrency trading platform for market scanning, trading strategies, position management, dynamic risk protection, exchange integration and performance monitoring.

Python FastAPI PostgreSQL Redis WebSockets Exchange APIs Pytest

MVP DEVELOPMENT

OfferHub

Founder & Developer

A digital offers and affiliate marketplace with merchant listings, offer discovery, category navigation, search, administrative management and affiliate redirect tracking.

Next.js TypeScript MongoDB

DEVELOPMENT PROJECT

NexusCRM

Developer

An AI-oriented customer relationship management application with leads, contacts, sales pipelines, tasks, activity timelines and customer management workflows.

DEVELOPMENT PROJECT

GuardianPC

Developer

A Windows parental-control application featuring screen-time tracking, configurable schedules, curfews, password-protected overrides and usage management.

Python Windows desktop development

FLUTTER PROJECT

Family Tree Application

Developer

A mobile application for managing family relationships, family profiles and genealogy records.

Flutter Dart JSON Local persistence

CONCEPT

MyOwnWay

Project concept

Fitness tracking application concept.

EXPLORATION

Live Transcription & Translation

Developer

Cross-platform speech recognition and translation exploration.

EXPLORATION

AI Terminal

Developer

Desktop developer-tool exploration.

Experience

Founder & Product Developer

Nadaruns

Product development, logistics workflows, mobile and web systems, business operations, customer communication and technical deployment.

2013–Present

Independent Software Developer

Independent learning and project-based development

Websites, mobile applications, backend systems and automation. Continuous independent learning since 2013.

WordPress & Content Development

Project-based experience

Website creation, WordPress management and content writing.

2024–Present · Permanent employee

Youth Services

Merikristalli Oy

Currently employed in a permanent position. Guidance and practical support for young people, daily activities, group activities, emotional support and communication.

01/2025–06/2025

Early Childhood Education

City of Valkeakoski · Vanhankylän päiväkoti

Childcare, daily routines, guidance, group activities, participation and communication.

2024–2025

Healthcare & Practical Nursing Experience

Hoivakoti Wäinämöinen · Pirha

Summer and substitute work, practical care and support with everyday activities.

03/2011–12/2022

Machine Operator & Quality Control

Styroplast Oy

EPS machine operation, general maintenance and quality control. Industrial teamwork, process discipline, practical troubleshooting and reliability.

2010–2011

Early-morning Distribution

Ojamomedia Oy

Distribution work documented in the previous CV.

04/2010–09/2010

Laboratory Research Assistant

HAMK Automaint

Programming and troubleshooting Siemens and Beckhoff PLCs; developing CAD models; programming and troubleshooting ABB and KUKA industrial robots.

05/2009–11/2010

Foreman

Missabib Oy

Worker supervision.

Practical Training

Valkeakoski youth services

Youth guidance, youth evenings and events, Ihana valo event organization and youth-service meetings. Other care and early-childhood placements are covered in the relevant entries above.

Education

Electrical & Automation Engineering · B.Eng

HAMK University of Applied Sciences · Valkeakoski, Finland

2008–2013 · Graduated 2013

Practical Nursing / Healthcare Studies

TAKK · Tampere, Finland

2023–2024 · Finnish vocational education and practical training; qualification completion details to be confirmed.

Independent Software Development

Continuous learning

2013–Present

Marine Engineering · National Diploma

Federal College of Fisheries & Marine Technology · Lagos, Nigeria

2006–2008

Senior Secondary School Certificate Examination

Ewu Grammar School · Ewu-Urhobo, Delta State, Nigeria

1995–2001

Strengths

Analytical thinking Independent learning Problem-solving Entrepreneurship
Cross-disciplinary understanding Technical troubleshooting Product development Adaptability
Communication Teamwork Creativity Continuous improvement

Languages & interests

English: native. Finnish: good spoken, satisfactory written. English/Finnish product development and localization. Volunteering, outdoor activities and hiking with family.
